Custom UAS Services and Solutions

Custom UAV Sales

MLB offers three UAV systems ranging in price from US\$120,000 to US\$320,000. Their different operational capabilities can be customized to address your budget and program requirements. We can integrate your payload, support equipment and data systems efficiently, and get you into the field rapidly to collect the information you need.

Training

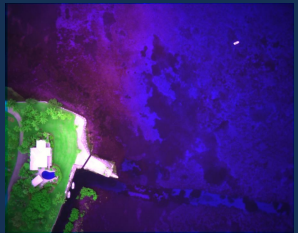

Need UAV flight training or proficiency maintenance? With over 15 years of UAV operational experience, MLB can provide custom UAV flight and system training services. Whether you are flying a UAV for the first time or need an update to stay current, MLB can provide a uniquely tailored training program to meet your needs.

Flight Operations and Aerial Information Processing

Want Access to aerial information, but don't want to own and fly a UAV? Leave the operations to MLB. We can deliver raw aerial imagery data, perform image post-processing, or stitch image sets to create a geo-referenced mosaic. Get timely hassle-free aerial information from us.

UAS Research and Design

Can't find the right UAS solution that meets your needs? MLB can develop a custom UAS solution for your unique requirements. Our engineering team has over 25 years of experience in consulting, basic research and system development. We have expertise in avionics, guidance and control, composite structures, mechanisms, aerodynamics, and production.
